

COURSE TITLE

DIGITAL AUDIO TOOLS FOR LANGUAGE TEACHING

Presentation

Language mastery is increasingly important in a globalized society, where we are all connected. In order to acquire an appropriate linguistic knowledge, it is necessary to have adequate materials and resources. These resources should be aimed at our students and focus on their own interests to create a positive emotion in the classroom that will impact on a better learning.

In this course you will learn to use different digital audio tools to edit own-created resources that can later be used during the class, at exams or as extra materials.

The **objectives** of the course are:

- To learn about the physical materials that we will need to record and edit our own files.
- To learn about the online resources that can be used while creating our materials.
- To learn how to use different recording programs and create our materials.
- To deal with the different audio problems that we may have during a recording.

Target group

The training course is addressed to primary and secondary school teachers, VET teachers, VET trainers, adults' teachers, managers and employees of enterprises as well as social and youth workers of non-profit organization and public entities.

Course language

This course can be provided both in English and Spanish.

Methodology

The methodology used in the course consists mostly on practical tasks with the teacher's explanation of specific contents related to the objectives of the course.

Constant feedback from the teacher will ensure that the concepts, tools and methods are acquired by all participants.
